

UFO Mushroom Lens

Small round lens, similar to the UFO Star Lens but with a hole all the way through for star effects.

Has a dome shaped profile. Supplied with a back washer which can be optionally fitted.

Description	
Material	Polycarbonate
Colors available	Clear
Size	0.26" (6.5mm)
Weight	0.004oz (0.1g)
Mounting hole size	0.12" (3mm)
Fiber size	0.03" (0.75mm), 0.04" (1mm), 0.06" (1.5mm) PMMA

Makes it easier to drill the holes required for small fibers from 0.03" to 0.04", while giving a sharper look to the light than the UFO Star Lens.

This fitting does not allow as good a seal as the Star Lens when used in damp areas.

The optional clear washer effectively expands the diameter of the lens where uneven holes have been drilled
