

PRODUCT SPECIFICATION SHEET

UFO 19M 90° Mirror Fitting

UFO LIGHTING

FIBER OPTIC & LED LIGHTING SYSTEMS

REVISION: B1

Product Overview

Mirror fittings are designed to deliver light at 90° to the run of the fiber tail.

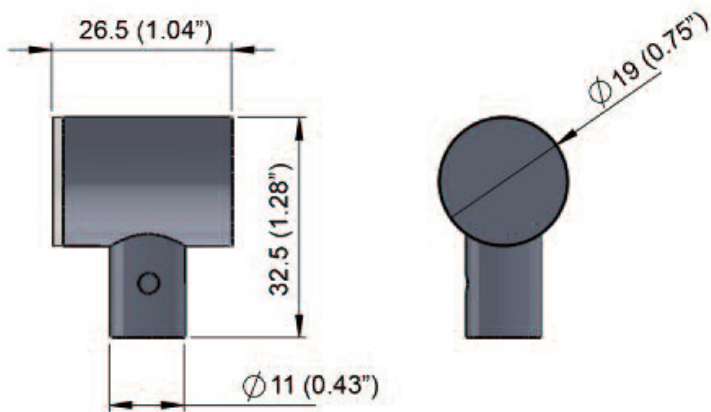

This allows the fiber optics to be used where there is limited space for the fitting and where it would be impractical to accommodate the bend of the fiber and the fitting depth conventionally.

The UFO19M is a round mirror fitting with a glazed front for use where an overall depth of 27mm can be accommodated. Suitable for use where a glazed front is needed for aesthetic purposes and to prevent dust ingress.

Technical Information

Glass	Clear
Beam Angle	45°
Material	Aluminum
Colors Available	Any custom RAL color
Size	20mm x 35.6mm x 20.70mm
Weight	15.5g
Ferrule Size	M8
Min. Fiber Size	2mm
Max. Fiber Size	6mm
