A larger-sized surface mount spotlight. Supplied with mounting bracket. Available in a range of finishes, this fitting can be rotated and tilted to point directly at any objects to be illuminated. This fitting is also available for use outdoors and is suitable for use where access above or below the mounting surface is not available.

The power cable can be threaded through the base of the fitting if required to create a neat finish.

Of course, like for all models in this range there are also high CRI LED array options available making it very suitable for use in display lighting applications. The XIM & XTM module options make for a very high powered spotlight fitting.
